PROJECTS

Vehicle Parking App | Vue 3, Flask, SQLite, Redis, Celery [Project Link](#)

- Developed a multi-user application for parking lot and reservation management, featuring role-based access (Admin/User), real-time spot allocation, booking history, cost calculation, and automated reminders/reports.

Chat App | React, Appwrite, Redux-toolkit, Vite [Project Link](#)

- Built a **real-time** chat application using React and Appwrite for secure **authentication** and **persistent data storage**, utilizing **data insights** to analyze **user behavior** and enable personalized recommendations.

Compresso (Article Summarizer App) | React, RapidApi, RTK Query, Tailwind [Project Link](#)

- Crafted an article summarizer with a modern React and Tailwind CSS UI, seamlessly **integrating APIs** for efficient article processing. Simplify reading, save time, and effortlessly grasp main points with clear and concise summaries.

Code Diary | React, Auth.js [Project Link](#)

- A **dynamic platform** for tech enthusiasts to share coding journeys, insights, and tips. Built on Next.js with MongoDB Atlas for data management and NextAuth for secure authentication along with Tailwind CSS for **engaging UI**.
